Testimonials

cyberSecurist

"cyberSecurist was methodical and precise in finding, triaging, and providing remediation advice for our web application and infrastructure vulnerabilities.

The engagement was professional and very well organized. Despite our rushed timeline for the engagement and limited time for hands-on work, Suhas, Mahesh, and team were able to orchestrate an efficient workflow and produce results within the short timeline.

We appreciate cyberSecurist for their professional work and excellent character.

We would highly recommend them to any company that is looking for quality Penetration Testing work."

Client Testimonial 2

"CyberSecurist has helped our team to conduct thorough security assessment of our product. They followed all right practices while assessing the security aspect of our product with a very detailed security assessment covering infrastructure, deployment, configuration, data exchange boundaries & so on.

We are impressed with the depth of knowledge and commitment to ensure that our platform goes to the market with high confidence on security."

"We trust cyberSecurist for their meticulous understanding of the business problems while they craft their IT security solutions.

They deliver what is required optimally for the situation and also hand hold for further approach. The team is highly proficient and has the ability to counter any complex project.

We strongly recommend them and wish them well. We look forward to a long journey further with them."

cyberSecurist

CyberSecurist team worked very professionally with us. They performed a detailed security vulnerabilities pen-testing on our product and enabled us to immediately close them in parallel. This helped in saving a lot of time. The report is very well structured and elaborately written.

The whole activity was conducted by a highly motivated and technology specialized team and I am very satisfied with the cooperation.

Keep doing the awesome job team cyberSecurist. I certainly would highly recommend cyberSecurist !
